Rules of the Awards Committee for the Footwear Conference 2011
on Symposium Homepage

Ned Frederick Young Investigator Award
presented by Li Ning, Ltd.

Kathryn Mills, P. Blanch & B.G. Vicenzino

Clinical efficacy of comfortable in-shoe foot orthoses has
no associated neuromotor adaptations during gait in
people with anterior knee pain: A randomized control trial

Benno Nigg Award for Applied Research
presented by adidas International

Bridget Munro, K. Mickle & J. Steele

Can flexible shoes improve function in the older foot?

Peter Cavanagh Award for Basic Research
presented by Nike, Inc.

Trampas TenBroek, P. Rodrigues, S. Murphy & J. Hamill
Cushioning mode and magnitude affect treadmill running
kinematics

Martyn Shorten Award for Innovation
presented by RS Scan International

T. Lee , W.-M. Chen, V.P.W. Shim, S.B. Park

Assessment of regional plantar shear forces at sub-mth
pad/foot supporting interface in walking

Alex Stacoff Award for Methodology
presented by Asics.

Jens Heidenfelder, T. Sterzing & T. Milani

Running shoe properties during age: a comparison of two
different approaches

Young Investigator Poster Award
presented by Brooks

J.W. Wannop, G. Luo and D. Stefanyshyn

Footwear traction and lower extremity non-contact injury

Most Impactful Poster Award
presented by New Balance, Inc.

Edwardo Murakami, M. Hatanaka and M. Mochimaru

Development of 3 axis spike force sensor and design of an
asymmetric golf shoe outer sole
